Protective security management systems

ProtectUK publication date

13/10/2021

Implementing a Protective Security Management Systems (PSeMS) supports a proactive approach for assessing and managing holistic security risks.

NPSA has produced guidance known as Protective Security Management Systems (PSeMS). PSeMS supports a proactive approach for assessing and managing holistic security risks. It's designed for senior leadership teams and security managers.

For more information, please visit the NPSA (formerly CPNI) website:
