HVM considerations for temporary Vehicle Security Barriers

ProtectUK publication date
14/02/2025

NaCTSO and the NPSA have released guidance to support local authorities, event organisers, and similar end-user groups in using temporary Vehicle Security Barriers (VSBs) as part of a Hostile Vehicle Mitigation scheme.

Hostile Vehicle Mitigation (HVM) guidance

The guidance, written by the National Counter Terrorism Security Office, National Protective Security Authority, government and policing leads for Hostile Vehicle Mitigation (HVM) contains crucial information about using temporary Vehicle Security Barriers (VSBs) as part of a HVM scheme, which itself should be one piece of a wider security plan.

It also poses pertinent questions, and signposts to further information and resources.

You can view and download the guidance below.
