

Control rooms

ProtectUK publication date

24/11/2021

A well-run control room can provide the fundamental principles of Deter, Detect and Delay.

Security Control Rooms (SCRs) form the hub of a site's security, continuously receiving information from a range of security staff and systems. Whether designing a new control room from scratch or looking to improve an existing control room, consideration should be given to the following items:

- people
- physical design
- implementation
- systems
- policies
- resilience
- response
