

NPSA: working with security professionals

ProtectUK publication date

23/08/2021

NPSA works with partners to identify risks and vulnerabilities to the UK's national infrastructure, and to offer advice to reduce them.

NPSA works with partners to identify risks and vulnerabilities to the UK's national infrastructure, and to offer advice to reduce them. Our partners include:

- the rest of the UK's intelligence community, government departments and devolved government with responsibility for infrastructure sectors
- businesses and organisations within the critical national infrastructure
- security specialists and advice delivery partners, including the police

For more information, please visit the [NPSA website](#).
