ETHANE checklist

ProtectUK publication date

09/03/2022

This checklist includes vital things to consider during a major terrorist incident. These steps will allow organisations to help and align with the emergency services.

The following ETHANE format can be used:

- Exact Location
- Type of incident
- Hazards present or suspected
- Access - routes that are safe to use
- Number, type, severity of casualties
- Emergency services present and those required
