See, Check and Notify (SCaN)

ProtectUK publication date
18/01/2022

See, Check and Notify (SCaN) is a free training programme that aims to help organisations, venues and events maximise safety and security using their existing resources.

Protect your site with SCaN training

Protect your site from a range of threats with SCaN training.

SCaN aims to help businesses and organisations maximise safety and security using their existing resources.

Your people are your biggest advantage in preventing and tackling a range of threats, including criminal activity, unlawful protest and terrorism.

SCaN training empowers your staff to correctly identify suspicious activity and know what to do when they encounter it. In addition to this, the skills your staff learn will help them to provide an enhanced customer experience. It helps ensure that individuals or groups seeking to cause your organisation harm are unable to get the information they need to plan their actions.

You can find out more about the SCaN modules and how to access them on the NPSA SCaN page.
