SCaN for security managers

This page is a dedicated space for security managers to utilise the SCaN tools and guidance available and tailored for security staff.

This module forms part of the SCaN for Security Managers programme. Those with managerial responsibility can share this with frontline security at an organisation, venue or event to further staff knowledge of hostile reconnaissance and how to help counter it.

You can find out more about SCaN for Security managers and the wider SCaN programme by speaking to your local Counter Terrorism Security Advisor (CTSA).
